Prepared by:

Mark Osmer - Water Master
David Pugsley, Rural Water Association of Utah

EXECUTIVE SUMMARY

Basically there are no changes to the Drinking Water Source Protection Plan for Leeds Well. The Implementation Schedule and Recordkeeping Sections have been updated.

1.0 INTRODUCTION

1.1 System Information:

Water System Name: Leeds Domestic Water Users Association
Water System Number: 27010
Address: PO Box 467627
Leeds, Utah 84746
Phone Number: 435 879-0278

1.2 Source Name:

Source Name: Leeds Well
Source Number – WS002
Source Type: Well

1.3 Designated Person:

Name: Mark Osmer
Address: PO Box 460502
Leeds, Utah 84746
Phone Number – 435-773-8830

2.0 DELINEATION REPORT

There are no changes

3.0 INVENTORY OF POTENTIAL CONTAMINATION SOURCES

There are no changes

4.0 IDENTIFICATION AND ASSESSMENT OF CURRENT CONTROLS

There are no changes

5.0 MANAGEMENT PROGRAM FOR EXISTING POTENTIAL CONTAMINATION SOURCES

There are no changes from the original plan or PCS's identified in the original source protection plans

6.0 MANAGEMENT PROGRAM FOR FUTURE POTENTIAL CONTAMINATION SOURCES

For future PCS's that move into the source protection area, the Leeds Domestic Water Users Association will contact the individual as they move into protection zones, include them on the inventory of PCSs, identify and assess current controls, and plan land management strategies if they are not adequately controlled.

There are no changes

7.0 IMPLEMENTATION SCHEDULE

There are no PCS's determined in the original source protection plans therefore there is nothing to implement

Leeds Domestic Water Users Association will discuss this source protection plan during their monthly meetings that is held at the Rice Bank. They will discuss Management of Potential Contamination Sources and other changes that are needed to keep this source protection plan current. The minutes will be included in the recordkeeping section of this plan that is on file at the water board office.

8.0 RESOURCE EVALUATION

There are no changes.

9.0 RECORDKEEPING SECTION

Best Management Practice letters referred to in Section 7 are attached.

10.0 CONTINGENCY PLAN

There are changes.

11.0 PUBLIC NOTIFICATION

This requirement has been completed by the Leeds Domestic Water Users Association.

WAIVERS

Leeds Domestic Water Users Association has Use Waivers and would like to reapply with this update. See Attached waiver request.

Use Waiver Application for:

Name of Water System: Use Waiver Application for:

Name of Water System: Use Waiver Application for:

Name of Water System: Leeds Domestic Water Users Association

Name of Drinking Water Sources: Leeds Well WS002

I, Mark Osmer, Designated Persons (per R309-600) for the Leeds Domestic Water Users Association Water System, hereby state that none of the volatile organic chemicals and/or pesticides within the respective parameter groups have been used in, disposed of, stored in, transported through, or manufactured within protection zones one, two or three (or within the management area, if applicable) in the last six years.

Dated May 12, 2016

Note: if applicable, you must provide a list of the chemicals used in, disposed of, stored in, transported through, or manufactured within protection zones one, two or three where the use of such chemicals within the volatile organic chemicals and/or pesticide parameter groups is likely.

In general, the presence of residences or roads through zones one, two or three implies that pesticides and volatile organic chemicals are used, and a use waiver in those cases will not be granted.
