WATER USE REPORT TO STATE ENGINEER FOR YEAR OF 1964
(To be completed and returned by March 15, 1965)

Name of System _____

Owner of System _____

Address _____ 84746

Name and title of person completing report R. A. Boulton; Secretary - Treasurer

A. System history and requirements

1. New service connections added during 1964 _____

2. Total of all service connections at end of 1964 _____

3. What per cent of the total service connections are metered? _____

4. Total amount of water used during 1964 10,742,112 gallons
(Please state if amount shown is in acre-feet, cubic feet, or gallons.)

5. Date when peak-day demand occurred midnight, but before 12:00 July 1964

6. Peak-day amount used during 1964 1,000,000 gallons
(Please state if amount shown is in cubic feet per second, gallons per minute, etc. Identify the units.)

a. Was this peak-day amount

----- (1) Only the quantity of water delivered to the distribution reservoir from all sources, or

--X-- (2) Does it include a withdrawal from the distribution system reservoir storage?

(Check which one applies.)

7. Give the total storage capacity of your distribution reservoir in acre-feet or cubic feet or gallons. (Please indicate which volume measurement you are using.) 10,000 gallons

8. Are master meters installed between the intake or diversion and the distribution reservoir? NO
(State Yes or No)

9. Are master meters installed between your distribution reservoir and the distribution system? NO, but some of the lines are not metered.
(State Yes or No)

b. Remarks (new sources, meter trouble, etc.) _____

(Over) No additional meter trouble

C. Water Sources

Water Source Name	Water Right	Type of Measuring Device	Month in which Source was Used	Total Water Delivered into System During Year	Flow from Source into System During Peak Demand
Spring at Groat Creek	1157	Hydrol (Individual)	12	Unknown (1)	Unknown (2)
				We have bored a spring at Groat's pipe. The water appears to come in our tank which feeds to QCCD gate, from this tank we take what we need for building purchase's, any excess flows out of the tank back into the vegetation stream for their use.	

(1) Indicate whether quantity given is acre-feet, gallons, cubic feet, etc.

(2) Indicate whether flow figure used is cubic feet per second, gallons per minute, gallons per day, etc.
