WATER USE REPORT FOR 1968
(Please complete and return by April 15, 1969)

Name of System Leeds Domestic Waterusers Assn.
Owner of System Same
Address c/o P?O?Box 687 Leeds Utah 84746
Name and title of person completing report A.A. Eastman Sec, Treas.

A. System history and requirements

- 1. New service connections added during 1968 None
- 2. Total of all service connections at end of 1968 60
- 3. What per cent of the total service connections are metered? 97
- 4. Total amount of water used during 1968 18,750,00 gal (Metered & Estimated
(Please state if amount shown is in acre-feet, cubic feet, or gallons.)
- 5. Date when peak-day demand occurred Unknown, peak month July
- 6. Peak-day amount used during 1968 Estimated peak for month 18,000,000 gal
(Please state if amount shown is in cubic feet per second, gallons per minute, etc. Identify the units.)

a. Was this peak-day amount

- (1) Only the quantity of water delivered to the distribution reservoir from all sources, or
- (2) Does it include a withdrawal from the distribution system reservoir storage?

(Check which one applies.)

- 7. Give the total storage capacity of your distribution reservoir in acre-feet or cubic feet or gallons. (Please indicate which volume measurement you are using.) 60,000 gal.
- 8. Are master meters installed between the intake or diversion and the distribution reservoir? No.
(State Yes or No)
- 9. Are master meters installed between your distribution reservoir and the distribution system? No.
(State Yes or No)

b. Remarks (new sources, meter trouble, etc.)

We contemplate installing (Over) totaling master meter.

C. Water Sources

<u>Water Source Name</u>	<u>Water Right</u>	<u>Type of Measuring Device</u>	<u>Months Which Source was Used</u>	Total Water Delivered into System During Year	Flow from Source into System During Peak Demand
<i>Henry on</i>	<i>Wright</i>	<i>measured</i>		(1)	(2)
<i>Creech Creek</i>		<i>meter</i>	<i>13</i>	<i>unreported</i>	

(1) Indicate whether quantity given is acre-feet, gallons, cubic feet, etc.

(2) Indicate whether flow figure used is cubic feet per second, gallons per minute, gallons per day, etc.
