What statement best describes the financial condition of your water system?

We meet the usual operation and maintenance expenses of our system from water bill revenues. Our budget is balanced.

Usually, we collect significant excess funds. These funds are put to other uses (e.g. transferred to the sewer system account, trash pickup account, etc.) or saved for future water system needs.

Usually, we collect significant funds which are held in reserve for future improvements or replacement of aging system components.

Usually, we are in the red. However, we do transfer funds from other activities (e.g. electrical generation, sewer fund, etc.) and this balances the water system budget.

Usually, we are in the red. Thus, we intend to raise our water rates.
